

At Covenant College we work as partners with parents to enable learners to develop into responsible, educated citizens, with sound Biblical principles as an inherent part of their decision making.

We guide and motivate our learners to develop in every area of their lives, educationally, spiritually and physically and to become innovative individuals who are able to express ideas and contribute to society.

Learners will experience Covenant College as a loving, caring and disciplined environment, where they are assisted in developing their own God-given talents and abilities.

As a Christian Private School the Word of God remains our final authority and the basis of our Statement of Faith, which guides our values and beliefs.

We appreciate that our learners will be active in careers that do not yet exist, and it is imperative that we prepare our learners for their future. Hence, we have implemented E- Learning (tablet based textbooks and resource materials) for all High School learners.

Learners are prepared for the matriculation examinations set by the Independent Examinations Board(IEB).
